

FIBER OPTIC SPLICE CLOSURE

This closure is a Fiber Infrastructure System Technology.

The generic closure is the environmentally sealed enclosure for the fiber management system that provides the functions of splice and passive component integration in the external network.

TECHNICAL SPECIFICATION

PART NUMBER	Q-CL-576
Number of oval port	1
Number of round ports	5
Max Fiber Capacity	Up to 576
Max Tray Capacity	8
Max Capacity of splice tray	72 fibers (single fiber)
Dimension	mm
L (with clamp)	305
Total height of the closure including the base	680
Oval port heat shrink sealing application diameter	for 2 cables 10 to 25
Round port heat shrink sealing application diameter	5 to 35
