

part number: **OUT-RDB-212**

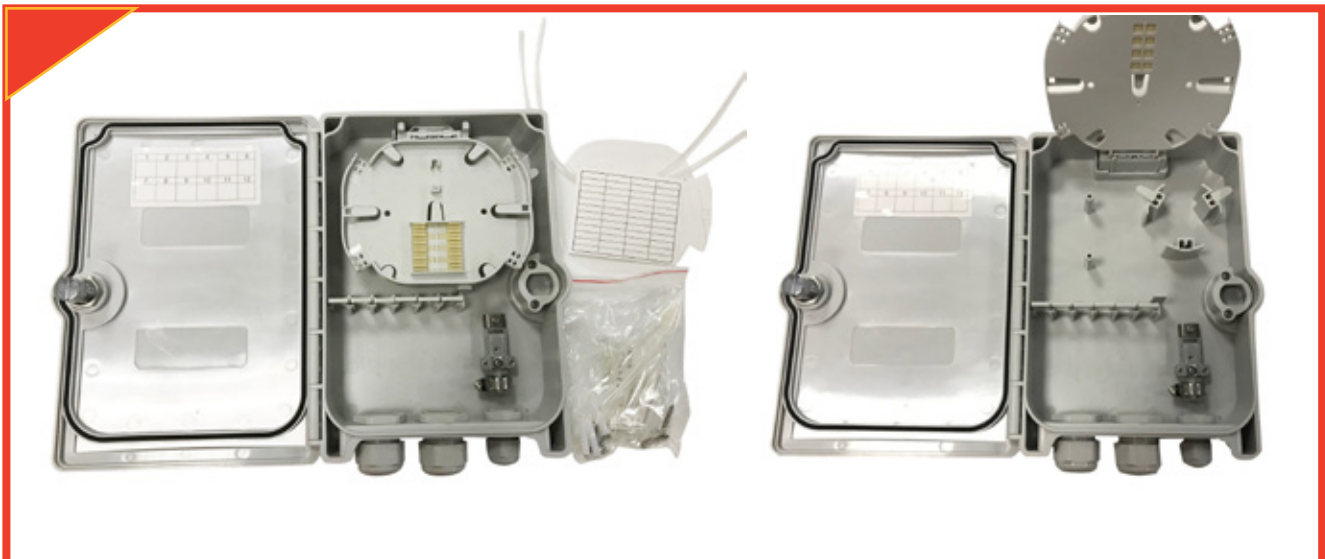

RADIAL DISTRIBUTION BOX

This box is widely used as a termination point for the feeder cable, to be connected with drop cables.

The feeder cable can be installed also as “loop” configuration.

The box can be used as splicing, splitting or distribution point. It is ideal in FTTH network building. It can be used indoor or outdoor.

FEATURES

- Structure totally closed.
 - Material: PC+ABS, wet-proof, water-proof, dust-proof, anti-aging, protection level up to IP65.
 - Clamping for feeder cable and drop cable, fiber slicing, fixation, storage, distribution...etc all in one.
 - Cable, pigtails, patch cords are running through own path without disturbing each other.
- It can accept up to 6 pcs SC duplex adapters.
- Distribution panel can be flipped up, easy for maintenance and installation.
 - It can be installed by wall-mounted, suitable for both indoor and outdoor uses.
 - Locked with key.
