

Splice-On connectors SC/APC are field-installable and represent an ideal solution for fast installations and in particularly difficult context. This type of connectors offer a fast execution time without the need for special crimping systems but rather using the splicer machine that is usually equipped with a plastic holder to allow the splice between the connector itself and the chosen 900um or 250um fiber cable.

PRODUCT CODE

KIT-CONN-SOC-SCA / Splice-on SC/APC Connector for 250/900um fibers

TECHNICAL FEATURES

FIBERS COMPATIBILITY	250/900 UM
INSERTION LOSS	Typ. 0.15 dB - Max 0.30 dB
RETURN LOSS	Min. 60 dB
FERULE	Pre-polished SC/APC
WORKING TEMPERATURES	-25 / +70 °C
DURABILITY (INSERTION CYCLES)	500 Cycles

DATACENTER

RETE
